

Performance C Series

Multi-Socket CPU Cooler M403

The compact M403 with its tower design is the multi-socket cooler from the Performance C Series. Three high-performance copper heat pipes dissipate 150W waste heat to the innumerable cooling fins. These reasons make the cooler ideal for powerful multi-core processors. Additionally, the heat transmission between CPU and cooler is very evenly and efficient due to the direct contact of heat pipes and CPU. The mounting material make this cooler suitable for all current AMD and INTEL sockets.

The scope of delivery not only includes the heat sink tower, as well as the 92mm PWM fan but also a holding module for Intel sockets 1150/1151/1155/1156/2011/2066/1200/1700, AMD sockets AM4/FM2+/FM1/FM2/AM2/AM2+ / AM3 and a tube of thermal paste. For the correct installation an illustrated manual is included.
